

PARTNER FACT SHEET

Protect Every Pour in Real-Time

REAL-TIME BEVERAGE MONITORING, VARIANCE TRACKING, AND KEG INTELLIGENCE

The GoTab x Bevchek integration connects your POS data with real-time beverage monitoring to help reduce waste, improve inventory accuracy, and protect margins. By matching every ounce poured to every ounce sold, operators gain immediate visibility into variance, keg levels, and draft system performance across every location.

KEY FEATURES

Nightly Variance Tracking

Every ounce poured is reconciled against every ounce sold in GoTab, helping identify shrinkage and losses the same day.

Real-Time Draft System Monitoring

Monitor temperature, pressure, foam, and other system conditions with instant alerts so issues can be resolved before they impact guests.

Live Keg Inventory & Forecasting

Track keg levels in real time and receive depletion forecasts to help prevent stockouts and improve ordering.

BENEFITS

Reduce Beverage Waste

Identify overpouring, leaks, and product loss with real-time visibility that can reduce beverage waste by up to 70%.

Improve Operational Efficiency

Automated monitoring and variance reporting help teams spend less time on manual inventory checks while improving accountability.

Added Protection

Keep draft systems performing at their best, prevent empty taps during peak service, and ensure every pour meets quality standards.
