

Where Sales Meet Labor

CONNECT SALES, SCHEDULING, TIPS, AND PAYROLL IN ONE SEAMLESS WORKFLOW.

The GoTab and Pivot integration connects POS sales with restaurant labor and employee operations. Sales and POS data flow from GoTab into Pivot alongside employee, labor, and tip data, giving operators real-time visibility into labor costs against actual sales while simplifying scheduling and payroll preparation. Together, GoTab and Pivot help restaurant operators reduce disconnected systems, streamline labor management, and manage teams more efficiently across one or multiple locations.

KEY FEATURES

Real-Time Labor Cost Visibility

Connect GoTab sales with labor data in Pivot to see labor costs against actual sales and better understand performance as it happens.

Scheduling & Employee Management

Manage employee scheduling and workforce information in one restaurant-specific platform, with connected data across locations.

Tips & Payroll Prep

Bring tip and employee data together to simplify tip management and streamline accurate payroll preparation.

BENEFITS

Make Smarter Labor Decisions

Compare labor costs with actual GoTab sales data to better understand staffing efficiency and make more informed scheduling decisions.

Consolidate Your Tech Stack

Connect POS, scheduling, tip management, employee management, and payroll workflows instead of relying on multiple disconnected tools.

Easily Manage Multiple Locations

Give multi-unit restaurant operators one operational layer for managing labor, employees, and payroll processes across their locations.
