

Why Choose GoTab + PourMyBev?

1. Auto-Close Tabs: Less Work, More Efficiency

Say goodbye to hours spent closing out tabs! With GoTab, tabs auto-close with a single tap—or let them close automatically at the end of the night.

2. Multi-Use RFID Ordering

Guests can use the same RFID card across multiple zones, vendors, and bars, creating a seamless ordering experience for both guests and staff.

3. Check-In & Check-Out at One Terminal

Simplify operations and cut costs by checking in and closing out guests from one unified system—no need for separate platforms.

4. Real-Time Tab Updates

Guests stay in control with real-time texted tab updates after every pour, ensuring transparency and convenience.

5. Pour With Your Phone

Forget the RFID card! Guests can use their phones to access the pour wall, making self-service even easier and more flexible.

6. Automatic Product Sync

Save time by setting up your products once in PourMyBev. No redundant entries required—products sync automatically with GoTab.

7. Better Reporting

Combine product mix data, including PourMyBev items, for comprehensive and actionable reporting insights.

8. Multiple RFID “Passes” on a Single Tab

Support multiple RFID passes on one tab, perfect for groups or events.

9. On Premise Server/Offline Mode

Enables you to keep pouring, even when the internet is down.
