

PARTNER FACT SHEET

Every Event, Under Control

**CONNECTED EVENT SALES,
AI-POWERED OPERATIONS, AND
SEAMLESS PAYMENTS, FROM FIRST
INQUIRY TO FINAL TAB.**

The GoTab + Reunion integration closes the gap between event sales and on-site execution. Event details, BEO line items, and guest data flow automatically from Reunion into GoTab, eliminating manual handoffs and keeping every team member aligned. The result: faster service, fewer errors, stronger revenue capture, and a guest experience reflecting the level of planning behind it.

KEY FEATURES

Automatic Event Sync

Events push from Reunion into GoTab automatically, giving operators real-time visibility into upcoming service needs.

Detailed Data Transfer

Key event details like guest count, timing, host info and notes along with BEO-based line items go directly into GoTab.

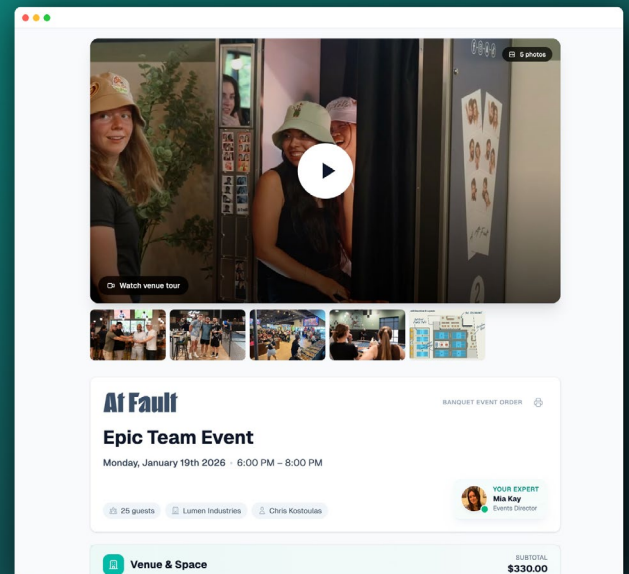

Sales-to-Service Handoff

Bridge the gap between Reunion's event planning and GoTab's on-site execution, with payments processed seamlessly at the point of service.

The Client Experience

Venue photos, video tours, and a polished BEO — all in one branded page.

BENEFITS

Eliminate Operational Errors

Auto-synced event data removes manual entry, reducing mistakes and saving teams valuable time.

Execute Events Consistently

Staff arrive prepared with complete, current event details for smoother, more confident service.

Capture Every Revenue Dollar

Centralized event data and payments improve billing accuracy, revenue tracking, and F&B reporting.
